

<b>AMFM-2526-506 Real-time Economics</b>		
<b>Name of lecturer(s) &amp; Email</b>	<b>Level/Semester, Status, Timing</b>	<b>ECTS*, CH &amp; SDL**</b>
Bernard Lalière <a href="mailto:blaliere@yahoo.fr">blaliere@yahoo.fr</a>	Semester 1 Compulsory Between 3/10/2025 to 7/11/2025	1.5 12 33
<p><b>Description of the course</b></p> <p>This course aims to provide a broad knowledge of the key economic releases that are used to analyze the economic cycle and that move the financial markets. It also aims to explain how these indicators are used to make forecasts and asset allocation decisions.</p> <p>After a brief reminder of the elements involved in the computation of GDP (<i>part 1</i>), the major economic releases will be analyzed by key categories (<i>Part 2</i>).</p> <p>The next part (<i>Part 3</i>) will analyze the yield curve and its influence on asset prices. It will also explain the role of central banks, their mandate, and their influence on the yield curve and the economic cycle.</p> <p>The first part of the course is an introduction to the basic concepts of GDP computation and its components. It presents the three approaches (income, expenditure, output), explains the difference between nominal and real GDP and explains the concept of the GDP deflator. The first part aims to outline why this measure is the most widely used indicator by economists and what its limitations and criticisms are.</p> <p>The second part of the course outlines the main economic data by categories: business sentiment surveys and production data, consumer sentiment surveys and retail data, external balance data, earnings releases, default rate and credit surveys, labor and unemployment data, real estate data and inflation data. It will explain their relevance and their impact on financial markets. It will distinguish between leading and lagging indicators.</p> <p>The third part of the course will examine the key role that the yield curve plays in the market prices of the major financial assets (Bonds, equities, foreign exchange, and commodities). It will review the different shapes of the yield curve and their significance. It will explain the role of central banks and how they implement monetary policy.</p> <p>The course intends to review and discuss major economic releases that will be published during October. Class discussions will be based on a press or economic article published during this period.</p> <p>Students will be required to read the article prior to class.</p>		
<p><b>Course units</b></p> <ul style="list-style-type: none"> <li>• Part 1: GDP</li> <li>• Part 2: Major Economic Indicators</li> <li>• Part 3: Yield Curve and Central banks.</li> </ul>		
<p><b>Course Learning Outcomes (CLOs)</b></p> <ul style="list-style-type: none"> <li>• Understand key economic data and its influence on the financial markets</li> <li>• Understand the influence of the yield curve on asset prices</li> <li>• Understand the role of the FED and ECB</li> </ul>		
<p><b>Prerequisite (if any)</b></p> <p>/</p>		
<p><b>Contribution to Programme Learning Objectives (PLOs)***</b></p> <ul style="list-style-type: none"> <li>• Learning Objective 1.1: Reinforcement</li> <li>• Learning Objective 2.1: Not covered</li> <li>• Learning Objective 3.1: Not covered</li> <li>• Learning Objective 4.1: Not covered</li> <li>• Learning Objective 5.1: Mastery</li> </ul>		<p><b>Evaluation scale</b></p> <p>0-20</p>
<p><b>Main Teaching methods used in the course</b></p> <ul style="list-style-type: none"> <li>• Lectures</li> <li>• Articles</li> </ul>		
<p><b>Contribution to the Environmental, social and governance (ESG)</b></p> <p>Course Contribution to ESG: No            Contact Hours are dedicated to ESG: 0            Contact Hours containing climate solutions for how organizations can reach net zero: 0            Description of contribution: 0</p>

\*ECTS - European Credit Transfer and Accumulation System (1 ECTS = 30 hours of learning)

\*\*CH - Contact Hours in class or online, SDL - Self-Directed Learning including readings, homework, group work, preparation to assessment, etc

\*\*\*PLO - Programme Learning Objectives are available on the curriculum page

## AMFM-2526-506 Real-time Economics

### Assessment methodology / Learners Use of Time and Load

#### Class participation

- weight 20%
- workload estimated = 1 hour
- Guidelines Students are required to participate in the class discussion and read the article prior to attending the class.

#### Written Exam

- weight 80%
- workload estimated = 2 hours
- due: 07/11/2025
- Guidelines: You will have an individual assessment based on the key concepts outlined throughout the course.

### Readings

#### Required

Powerpoint presentation shared in Canvas.

#### Recommended

Central bank releases.

### Other Learning Materials

/
