<p>Description of the course</p> <p>This course explores the most specific aspects of investment banking, namely those around corporate finance and primary markets. As such, the course examines a comprehensive set of financial situations that arise in companies and is designed to provide students with a practical understanding of such topics like initial public offering (IPO) and other equity capital market instruments, bond offerings, syndicated lending, mergers and acquisitions (M&A). Other more specific financing structures such as leverage-buy-out (LBO) and asset securitization are also reviewed. The institutional aspects of investment banking, the conflicts of interest issues and in general the role of compliance and ethics in investment banking will also be covered.</p> <p>The course draws to a large extent upon analytical techniques provided in previous courses, deepens and extends the core theory introduced in those courses by examining applications. The theoretical background will be completed with case studies that will constitute the basis for most class discussions. Appropriate background readings will be provided to students but students are also encouraged to perform their own research if deemed appropriate. Students are expected to be prepared for each class discussion.</p>		
<p>Course units</p> <ul style="list-style-type: none"> • Chapter 0 : Course Organisation • Chapter 1 : Investment Banking – an overview • Chapter 2 : Selected pre-requisites • Chapter 3 : Equity Capital Markets • Chapter 4 : Debt Capital Markets (Syndicated loans, bonds, LBOs, asset securitisation) • Chapter 5 : Mergers & Acquisitions • Chapter 6 : Governance / Ethics / Perspectives
